

RedLine Cooler

Streamlined Cooler Management

RedLine Cooler™ is a complete, mobile, inventory management solution. From the moment products are received at your facility until they are shipped to your customers, RedLine Cooler records and updates inventory information. This includes product location, movement, validated order picking, and real-time shipping transactions. The net results are **improved product rotation, fewer errors, increased worker productivity and you can load your trucks faster.**

Real-Time Visibility

Traditional paper-based inventory management methods slow down your operations and are prone to human error. RedLine Cooler uses WIFI enabled rugged mobile scanners to for real-time connectivity. This allows workers to view and record information about their activities when and where the work is performed. RedLine Cooler's integration with Famous Software™ validates all actions in real-time, catching errors before they occur.

Accurate Order Fulfillment

- Quickly and accurately ship orders with confidence. Our directed activities enable your team to locate product faster and ship more orders per day while capturing traceability information. Our mobile scanners eliminate the need to key in pallet tag IDs in the office, saving time and eliminating data entry errors.
- Directed picking and shipping rules optimize order fulfillment, increasing speed and accuracy
- Specific order requirements are highlighted on-screen
- Substitutions are flagged for visibility
- Pallet consolidation tracks pallet changes at the case level
- Reserve individual pallets for specific orders
- Real-time validation of all actions eliminates errors

Real-Time Inventory Control

RedLine Cooler manages inventory with wireless scanners, ensuring complete and up-to-date inventory visibility, while reducing waste and write-offs.

- “Directed” features include put-away, picking, reserving and shipping that enforce rules and optimize stock rotation.
- Every action is recorded and passed to the accounting system as it happens
- Inventory inquiries display information by product, grower block, lot, pallet, or location
- Real-time physical inventory counts on the mobile device are fast and accurate, enabling timely reconciliation
- Treatment tracking captures treatment details and resource utilization
- Maximizes forklift operator productivity while reducing bottlenecks in the shipping office

Real-Time Traceability

RedLine Cooler automatically tracks detailed information at the case, bin, and pallet level, meeting and exceeding traceability requirements.

- Records GTIN and Lot ID at the case and pallet level, ensuring PTI compliance
- Generates hybrid pallet tags on demand
- Order traceability lets you know which customers received a specific GTIN and Lot
- Tracks and records the location of every pallet or bin within your facility
- Pallet audit trail offers a complete history of the pallet’s movement through the cooler, including who took what action, where, and when

Proven Reliability

RedLine Solutions has provided inventory and whole chain traceability systems for growers, packers, and shippers for eighteen years. With more than 150 fresh produce installations across dozens of different commodities, we have deep experience delivering practical solutions that work the way you do. We work closely with your cooler operations team to identify, configure, and install the most appropriate solution for your business. RedLine provides all the hardware, software, services, and supplies for the complete solution.
